SOFTWARE DEVELOPER

TECHNICAL SKILLS

- MERN Developer
- C/C++
- Data Structure and Algorithms
- Networking
- Flutter
- Data Analysis
- Arduino/Raspberry pi
- Burp Suite
- API's

PROJECTS

- CDMArena: Dynamic MERN-Based Platform for Device Specs & Tech News | MERN** June 2024
- Developed TechSpecs Hub, a dynamic MERN-based platform for mobile and computer specs and tech news. Implemented a comprehensive database with MongoDB and a responsive React frontend.
- StyleHub: A MERN-Based dynamic E-Commerce Platform for Fashion | MERN** May 2024
- Developed StyleHub, a MERN-based e-commerce platform for fashion, featuring a MongoDB backend and a dynamic React frontend
- Custom Automated App for Students and Developers | Flutter** March 2024
- This Flutter app aims to streamline student and developer workflows by automating tasks like to-do lists, WhatsApp interactions, and note-taking.
- Automated Drone using Arduino** February 2024
- This project focuses on creating an Arduino-based drone that can autonomously track people and follow them
- Indian Sign Language Conversations System | ML Project** August 2023
- This ML project develops a system for translating Indian Sign Language into text or speech, utilizing image processing, NLP, and other machine learning techniques.
- Car Crash Detecting System | Arduino | IOT based Project** January 2023
- An Arduino-based IoT project using ultrasonic sensors to detect car crashes and send alert messages to a designated phone number.
- Public Secure Key System | CLI Project and Application** August 2022
- This project aims to protect sensitive data like passwords and credit/debit card details using Triple DES encryption, detect potential Dark Web exposure, and streamline secure logins with vulnerability assessments.
- Jigyasa Web-Development and Flutter App** June 2022
- This React application aims to be a knowledge-sharing hub, connecting users with companies and organizations, while analyzing user data to provide personalized recommendations.

EDUCATION

- Eklavya International Academy | Science Maths | Jaipur March 2019 - April 2021
- B.Tech | Computer Science Engineering | JK Lakshmipat University August 2021

WORK EXPERIENCE

- Full Stack Mobile Developer | Hydracoral** May 2023 - November 2023
- Developed a hybrid app for both platforms by integrating API which was developed by my team in the company.
- Freelancer | UpWork / Freelancer / Fiverr / Replit** November 2022 - Present
- Developing and Deleverage Websites, Application and Generative AI applications to the clients.
- Full Stack Web-Developer | Disha Creation** Jan 2022 - March 2022
- Developed &managed the frontend side of the codebase using ReactS, Typescript, and Material UI and backend with FireBase.
- Campus Organizer/Lead | Google Developer Group** August 2024 - Present
- Leading a Developer's Community with more than 800+ developers in it.

AWARDS / CERTIFICATES / ACHIEVEMENT

- CCNA v7 - Introduction to Networks
- CCNA v7 - Switching and Routing
- CodeChef 4 Star
- German / Deutsch - A1, A2 and B1 - Goethe Institute
- Freelancer (Over 25+ projects delivered)
- Smart India Hackathon (2022)
- Hackerrank Java 5 Star and C++ 5 Star
- Full Stack Mobile Development - udemy
- Full Stack Web Development - udemy
